Chemical Regulation Data Manager (m/w/d)

Job ID: 84587/ Location: Trier / Start: As soon as possible

In order to strengthen our Scientific and Regulatory Affairs Department (SRA) department based in Trier, we are looking for a **Chemical Regulation Data Manager (m/f/d)** on a temporary basis for one year during parental leave with potential extension. The position could be considered as entry-level role if the educational background is suitable.

Your Responsibilities:

- Ensure maintenance of ChemGes Safety Data Sheet (SDS) & Labelling Software in accordance with the latest regulatory developments and JTI best practices to meet current and future JT group business requirements
- Author and maintain JT group SDSs and Hazard labels in accordance with EU CLP. Prepare required and regulatory translations to other GHS standards
- Provide regulatory guidance regarding applicable product classification and labelling requirements
- Monitor evolving chemical regulations, assess their business impact and support subsequently the development of appropriate processes to ensure compliance
- Supports ongoing compliance with existing chemical regulations such as REACH, K-REACH, KKDIK, EAEU technical Regulations, CLP/GHS and equivalent requirements
- Contribute to other projects within the wider SRA department as required

Your Profile:

- Scientific or technical bachelor or academic degree in a scientific discipline
- First experience (e.g. internship) with the implementation of chemical, technical regulations and standards is advantageous
- First knowledge of Chemical Management and Hazard Communication regulations is advantageous
- Strong analytical and conceptual thinking and confidence in dealing with internal & external partners
- Solid in MS Office especially Excel; PowerBI, PowerQuery, SQL, SAP are advantageous
- Fluent in written and spoken English
