

The Webasto Group is one of the 100 largest suppliers to the automotive industry. With our innovative sliding and panoramic roofs, convertible roofs as well as trend-setting thermal, battery systems and charging solutions we create added value for mobility time and again. And we convince through a particularly strong sense of unity. Because our "we" is your special plus.

At Grevenmacher we make more than automotive glass. We make people's lives safer and more comfortable along their journeys. Every day, we unite as a team to deliver quality products and innovative solutions that earn our customer's trust and build lasting relationships.

We have an immediate opening for a: **PACKAGING COORDINATOR (M/F/D)**

Role:

➤ **Design Packaging & Validation**

During the development phasis of our new project nomination, you will be a key member of the project team to orientate some technical decision on product & on process to let the future packaging concept as much as possible on simple level of use.

You will define the detailed packaging specification to fulfill the customers and our requirements (sustainability....). Then, you will participate to the Request for quotation process and the selection of the best offer with our Purchasing Team.

You will work closely with the supplier to design and to validate the packaging through an internal and a customer approval processes.

Your choice on the packaging design will have a major impact on Safety, Quality and Logistics cost on price/ part.

You will define the standard document to guide the operators on the way to respect your requirement to ensure that your new packaging will be well respected in our production area,

Moreover, you will focus also on some improvement related to the raw-material packaging as well as other subjects.

➤ **Design the Supply flow**

Following your experience in logistics, you will define and optimize the needed quantity of racks or containers (packaging name to transport our glass products) to ensure the delivery to our customers and subcontractors at the best financial level without failure flow.

You will take in consideration the different aspects for the shipments by road/ air/ sea mode...

➤ **Maintenance Packaging**

The 2 members of your maintenance Team will maintain the packaging material on the appropriate condition to ensure the safety, the quality for our production people and our product.

Moreover, with your team, you will be able to realize some prototype and to realize some technical modification

➤ **Container Management**

Most of our customers allocate to their suppliers their own packaging. Consequently, a deeper follow-up is mandatory. A monthly and a yearly inventory have to be performed in details.

Your team member will follow and track on daily basis all the container movements through the logistics documents.
